

NetCOLOR Third National Workshop, May 2020, University of Victoria, BC

Save the date!

NetCOLOR

NetCOLOR will hold its third national 3-day meeting at University of Victoria, BC the second week of May (days to be confirmed)

Submit your abstract, including a title and short description (50-80 words) to maycira@uvic.ca and emmanuel.devred@dfo-mpo.gc.ca by **March 31st, 2020**. Topics covered may include, but are not limited to, remote sensing of Arctic, monitoring of freshwater, remote sensing of Canada's coast (including bathymetry, bottom habitat and atmospheric correction), application of aquatic visible remote sensing to fisheries and aquaculture. Indicate if you would prefer an oral presentation or poster.

Agenda will be finalised once abstracts have been confirmed. The first 2 days of the meeting will be dedicated to science findings, while the third day will be dedicated to fisheries and aquaculture with participation from industry, NGOs and government bodies.

We strongly encourage students to take advantage of this opportunity to expose their work to the community and meet with their peers. **Funding is available for students upon request (thanks to MEOPAR).**
